Professional Summary

Senior Software QA Engineer with nearly 6 years across manual testing, automation, API and data validation, and web engineering. Covers requirements analysis, risk-based test design, exploratory and regression testing, defect management, and release validation. Builds Playwright coverage in TypeScript, validates REST APIs and SQL data, and integrates checks into GitHub Actions.

Core Skills

Manual QA and Test Design: Requirements analysis, test plans, cases and scenarios, exploratory, functional, smoke, sanity, regression, integration, risk-based, visual, responsive, and cross-browser testing

Automation and Languages: Playwright, TypeScript, JavaScript, Selenium, Python (working knowledge), end-to-end regression, human-reviewed AI-assisted test ideation

API, Data, and Debugging: REST APIs, Postman, SQL validation, status codes, JSON payloads, data consistency, Chrome DevTools, WordPress

Delivery and Defects: Jira, ClickUp, defect lifecycle, triage, severity, retesting, release validation, GitHub Actions, CI/CD, Git, Docker

Professional Experience

Startise - Dhaka, Bangladesh

September 2021 - May 2026

Senior Software Test Engineer (Promoted)

April 2025 - May 2026

- Owned QA from requirements review and risk-based planning through execution, defect triage, and release validation.
- Executed exploratory, functional, integration, regression, visual, responsive, and cross-browser testing; documented high-impact edge cases and reproducible defects.
- Built Playwright automation in TypeScript and used human-reviewed AI-assisted analysis to expand critical workflow and regression coverage.
- Validated REST APIs and SQL data, integrated checks into GitHub Actions, and communicated release risks across engineering and product teams.

Software Test Engineer

September 2021 - March 2025

- Designed and executed manual test cases using exploratory, functional, smoke, sanity, regression, responsive, and cross-browser testing.
- Managed defects through reporting, severity, evidence, retesting, and closure; supported release validation with engineering teams.

FLUX IT - Dhaka, Bangladesh

August 2020 - August 2021

Software Engineer - QA and Operations Focus

- Developed and maintained client-facing WordPress websites with JavaScript and PHP while supporting production quality.
- Performed pre-release functional and exploratory testing, reported client defects, and diagnosed frontend failures with Chrome DevTools and developers.

Selected Projects

QA Assistant

WordPress, PHP, Git

WordPress.org | GitHub

- Created and published an open-source WordPress plugin that streamlines multi-branch testing through Git controls, status visibility, safety checks, and failure handling in the administration interface.

Essential Addons for Elementor - Playwright Automation

Playwright, TypeScript, WordPress

GitHub

- Contributed Playwright automation and release validation for Essential Addons for Elementor, supporting 2M+ active installs across critical widgets, responsive layouts, and cross-browser workflows.

Education

Bachelor of Science in Computer Science and Engineering

April 2015 - March 2019

University of Asia Pacific - Dhaka, Bangladesh
